Manufacturers Representative covering Northern California, Select Southern California, Northern Nevada and Hawaii

Board and System Products: SBCs, SSDs, ARM SiP (System-in-Package) Processors, Rackmount and Boxed Embedded Computers, Chassis & Packaging Solutions, Industrial I/O, 1, 10, 40, 100GB Ethernet Interfaces, LCD Displays, Thermal Management Solutions, Protective Packaging for shipping and handling of High Value die and devices. Standards supported: PCI, PCIe, Compact PCI, Mini-PCIe, PMC, SATA, SCSI, VME, VPX, XMC, FMC, GbE, Serial RS232/RS485, CAN BUS

- SSDs for SATA, PCIe, PATA or SCSI Interfaces, from Disk-on-Chip to custom packaging or unique form
- High Capacity BLUE series up to 8TB in a 2.5" form factor, ORANGE for most Defense applications, and BLACK for extreme shock and vibration (Mil-STD-810G standard)

- System-In-Package (SiP) Solutions for **TI**, **ST Micro** and **AMD** processors for faster time-to-market
- OSD32MP1-STMP57 based processor, NEW upgrade option to the STM32MP257
- OSD335x TI 3358 based SiP, NEW upgrade path to OSD62x TI 6254 processor with 1 GB DDR4
- OSDZU3-AMD's Zynq ZU3 Processor with a full compliment of I/O interfaces and Ultrascale + FPGA

- Dev/Design of Modules, Cases and 19" Rackmount accessories for electronic packaging
- VME, VPX & CompactPCI Backplanes and Systems including cable assembly
- Sheet metal, molded **plastics** and surface treatments
- Northern and Southern California

- **Gel-Box™** For secure shipping and handling of small valuable devices
- Gel-Pak VRTM (Vacuum Release) For secure shipping and handling of larger devices
- Gel-Pak Gel-Film® / Vertec® Films for many customizable applications
- Northern and Southern California

- Two-Phase Heat Transfer (fluid flow) with Heat Pipes, Ultra-Thin Heat Pipes, Vapor Chambers and Heat Columns
- Cold, Tube and Vacuum-Brazed Cold plates for liquidcooled heat dissipation

- Cabinets, Racks and Accessories
- Rugged solutions for use in defense, railway, communication and energy applications
- Modular components for standard and easily tailored solutions
- Northern and Southern California

- Standard, custom and private label Industrial and Medical Grade LCD Monitors
- Industrial-grade components to ensure long-term 24/7/365 performance
- 8" to 75" for use indoors or outdoors, with or without touchscreen
- Northern and Southern California

Sales Engineers:

East Bay, North East CA Alan Azumbra: alana@eswest.com Southern CA, Northern NV Elliott Boggs: elliottb@eswest.com Santa Clara County, Central CA & Hawaii Glen Kumamoto: glenk@eswest.com

Test and Measurement: Environmental, Corrosion and HALT Chambers, Industrial Ovens, Furnaces, ED (Electro-Dynamic) Shakers, Amplifiers, Shock Testers, Vibration Controllers and Software, Pressure Calibrators, Controllers and Sensors, Accelerometers, Data Acquisition Systems, Power Supply and Device Testing Systems

- Salt Spray Environmental Test Chambers Standard or Premium (for 2-part cycle) options, 4.2 cu. ft. – 91.8 cu. ft.
- Cyclic Corrosion Chambers with 6 distinct climates, 10.5 cu ft. - 91.8 cu. ft.
- **Atmosfar Corrosion Test Chambers** for fully automatic automotive manufacturer's test profiles
- Northern and Southern California

- Temperature/Humidity Environmental and HALT/HASS Chambers
- Benchtop size to full Walk-in/Drive-in
- Thermal Shock Air-to-Air & Liquid-to-Liquid Chambers and Combined: Altitude/Vibration/Temperature/Humidity

- **Full Range of Piezo-Resistive Pressure Sensors**
- Pressure Calibrators and Pumps, including multi-function and HART/Fieldbus Communicator options
- PACE Pressure Controllers with optional TERPS Technology (Trench Etched Resonant Pressure Sensor for highest accuracy and stability)

- Bench, Walk-in, Lab, Clean Room and Conveyer **Ovens**
- **Inert Atmosphere Ovens** to minimize oxidation of
- Bench, Tempering, Box and Pit Furnaces to 2200°F

- Portable Multi-Channel Data Recorders with 10 to 200 universal inputs and optional battery operation
- **High Speed Multi-Function Recorders** with 2-6 channels and sampling rates up to 1 MSa/s/ch
- Configurable Data Acquisition Systems with slots for input modules and sampling rates up to 1 MSa/s/ch
- Northern & Southern California

- **Piezoelectric Accelerometers and Pressure Sensors**
- **IEPE Accelerometers & Signal Conditioning Equipment**
- Vibration testing instrumentation including amplifiers, meters and calibrators

- Vibration Testing Equipment with output force from 440 lbf to 77,000 lbf
- Slip Tables from 11.8 in. square for small shakers to 6.6 ft. square for large sized specimen tests
- **Digital Switching Power Amplifiers and Shock Testers**

- **Power Supply Systems** High accuracy for Particle accelerators and Quantum and Nano Physics
- **Reliability test bench** Power device testing, integrated with temperature control to ITEST's Test Benches or stand alone
- **DC or Pulsed Reliability tests** GaN/SiC transistors, Power Diodes, Laser Diodes, RF Systems

- VR10500 16 to 512 channel vibration controller
- Electrodynamic shakers from 10 lbf up to 500 lbf
- ObserVR1000 4/16ch Portable Data Acquisition
- **ObserVIEW** Vibration test development software that can work with data from any DAO device
